ADMINISTRATIVE COMPLAINT

COMES NOW, Petitioner, Department of Health, by and through its undersigned counsel, and files this Administrative Complaint before the Board of Medicine against the Respondent, Kenneth N. Wollner, M.D., and in support thereof alleges:

1. Petitioner is the state department charged with regulating the practice of medicine pursuant to Section 20.43, Florida Statutes; Chapter 456, Florida Statutes; and Chapter 458, Florida Statutes.

2. At all times material to this Complaint, Respondent was a licensed physician within the State of Florida, having been issued license number ME 80412.
3. Respondent's last known address is Holistic Family Medicine, 2499 Glades Road, #106-A, Boca Raton, Florida 33431.

4. Respondent is board certified in family medicine by the American Board of Family Medicine.

5. On or about May 20, 2003, Patient W.B., a forty-five (45) year-old male, presented to Respondent with complaints of headaches, feeling weak and lethargic.

6. Respondent did a complete history, completed a physical examination, and did laboratory testing. Respondent diagnosed Patient W.B. as having myofacial trigger point headaches and psoriasis.

7. On June 25, 2003, Respondent saw Patient W.B. and noted that his headache was better. Respondent diagnosed Patient W.B. as having tension headaches, psoriasis, Hashimoto's thyroiditis, and adrenal insufficiency.

8. At the time of Respondent’s diagnosis of thyroiditis (inflammation of the thyroid), Patient W.B. had no tenderness of his thyroid, no enlargement of his thyroid, no compliant of soreness in the thyroid area, no elevation of his sedimentation rate, no evidence of a
weight loss, and was not orthostatic, hypotensive, and/or hyperpigmented. Patient W.B. was afebrile and his vital signs were normal.

9. Respondent prescribed Armour Thyroid at 30 mg. q.i.d. and advised the patient to buy Dehydroepiandrosterone (DHEA) 10 mg. and take it every day.

10. From August 12, 2003 through June 21, 2004, Respondent increased Patient W.B.'s Armor Thyroid to 180 mg. even though Patient W.B. had become more symptomatic and experienced increased anxiety, night sweats, recurrent headaches, sluggish in the mornings, fatigue at night, and excessive sweating.

11. On June 21, 2004, Respondent changed Patient W.B.'s thyroid medication to Levoxyl 100 mg. two each morning and one each night, which represented doubling of Patient W.B.'s thyroid medication, even though Respondent had conducted no new thyroid testing since June 2003.

12. On July 12, 2004, Respondent called in a prescription for Cortef 5 mg. four times a day without seeing Patient W.B. and without noting any warning about possible side effects.

13. Armour Thyroid, Levoxyl, and Cortef are legend drugs as defined by Section 465.003(8), Florida Statutes. Substances designated as
legend drugs are required by federal or state law to be dispensed only upon presentation of a prescription written by a licensed health care professional authorized to prescribe prescription medications.

14. On July 12, 2004, Patient W.B. saw another doctor who finally had laboratory testing performed. He faxed the results to Respondent and recommended that Patient W.B. be taken off the thyroid medication. Respondent disagreed and continued the medication.

15. On or about July 19, 2004, Respondent saw Patient W.B. at which time Patient W.B. was taking Cortef 3.5 mg. once a day, Levothyroxine 300 mg. per day, plus nutrients. Respondent then also prescribed Adderall 10 mg. one-half to one mg. two times a day without any discussion of the addicting potential of this medication nor its possible side effects. Adderall, an amphetamine, is only indicated for attention-deficit hyperactivity disorder and narcolepsy and has no application to any condition that Patient W.B. was experiencing.

16. Adderall® contains amphetamine in sufficient quantities to be classified as a schedule II controlled substance listed in Chapter 893, Florida Statutes. Adderall has a high potential for abuse and has a currently accepted but limited medical use in treatment in the United
States. Abuse of this substance may lead to severe physical and psychological dependence.

17. Patient W.B. last saw Respondent on September 29, 2004, when he was demonstrating significant symptoms of hyperthyroid which were not recognized by Respondent.

18. On or about October 20, 2004, Patient W.B. presented to a subsequent treating physician with complaints of weight loss, night sweats, insomnia and weakness.

19. Patient W.B. was diagnosed as clinically and chemically hyperthyroid, weak and depressed showing evidence of being overdosed on thyroid and hydrocortisone medication, which required gradual weaning based on the length of time the unnecessary medications were prescribed.

20. Petitioner realleges and incorporates paragraphs one (1) through nineteen (19) as if fully set forth herein.

21. Section 458.331(1)(t), Florida Statutes (2003)(2004), provides that the failure to practice medicine with that level of care, skill, and treatment which is recognized by a reasonably prudent similar physician as

c) by inappropriately interpreting the patient’s laboratory results;

e) by failing to perform an ACTH stimulation test;

f) by prescribing a stimulant amphetamine to the patient with no clinical indication or need for the drug;

g) by diagnosing the patient with Hashimoto’s thyroiditis who had no indication clinically or biochemically.

h) by failing to consult with an endocrinologist rather than treating conditions that did not exist;
by in accurately diagnosing the patient;

j) by rendering unnecessary treatment to the patient resulting in the patient becoming hyperthyroid; or

k) by prescribing unnecessary medications to the patient resulting in the patient becoming overdosed on those medications.

23. Based on the foregoing, Respondent has violated Section 458.331(1)(t), Florida Statutes (2003)(2004), by failing to practice medicine with that level of care, skill, and treatment which is recognized by a reasonably prudent similar physician as being acceptable under similar conditions and circumstances.

b) by failing to document any discussion of addicting potential of the medications;

c) by failing to keep medical records which adequately assess the patient's complaints and symptoms; or

d) by failing to document any side effects suffered by the patient.

27. Based on the foregoing, Respondent violated Section 458.331(1)(m), Florida Statutes (2003)(2004), by failing to keep legible medical records that justify the course of treatment of W.B.

For the purposes of this paragraph, it shall be legally presumed that prescribing, dispensing, administering, mixing, or
otherwise preparing legend drugs, including all controlled substances, inappropriately or in excessive or inappropriate quantities is not in the best interest of the patient and is not in the course of the physician's professional practice, without regard to his or her intent.

30. Respondent inappropriately prescribed legend drugs, including controlled substances inappropriately, in one or more of the following ways:

   a) by prescribing thyroid hormone replacement medication to a patient whose thyroid levels were normal prior to treatment;

   b) by prescribing a stimulant amphetamine to a patient with no clinical indication or need for the drug; or

   c) by inappropriately prescribing Levothyroxine and Cortef to the patient resulting in the patient being overdosed on the medications.

WHEREFORE, the Petitioner respectfully requests that the Board of Medicine enter an order imposing one or more of the following penalties: permanent revocation or suspension of Respondent's license, restriction of practice, imposition of an administrative fine, issuance of a reprimand, placement of the Respondent on probation, corrective action, refund of fees billed or collected, remedial education and/or any other relief that the Board deems appropriate.
