

Patient Assessment

The clinic physician assesses every patient's need for treatment, medical records are reviewed, to determine patient's appropriateness for treatment. Laboratory tests, X-rays, ultrasounds, cat scans, if indicates, will be ordered. Most local hospitals will accept PPO insurance or cash for these tests.

Patient Reassessment

Patients are reassessed once or twice weekly to determine progress or need for continuation of care.

Initial consultation

We prefer that a patient visit the clinic in person for site check. Initial evaluation days are Tuesdays and Fridays. An appointment is required. Please call (818) 920-2000 or Fax (818) 920-0028 to set up an appointment.

Medical Records

We recommend that a new patient bring any medical records they may have with them if possible for review at the time of your visit.

Companionship

Most patients feel more comfortable with a family or close friend with them, we highly recommend that you bring someone that you trust to help you make decisions for treatment and during your treatment.

Referral System

Cancer patients that could benefit from surgical intervention are referred out to the appropriate surgeon of their choice, and those that could benefit from the newer forms of chemotherapeutic agents are referred for these treatments to the oncologist of their choice.

Most health insurance companies will pay for conventional cancer treatments but not for alternative treatments for cancer. However, for those patients whose cancer did not respond to conventional cancer treatments from their oncology doctor, or those patients with advanced cancer that have come to the end of their cancer treatment road, or those who could not tolerate the available conventional cancer treatments for one reason or another, they may elect to be placed on our alternative cancer rehabilitative program, if they qualify. *Space is limited and there may be a waiting period.*

Our Treatment Program

We offer a six-month program for cancer patients consisting of

1. Intensive supportive and adjuvant therapy.
2. Complex herbal nutritional supplements to help the body heal itself.
3. Physical therapy as tolerated to improve strength and well-being and improve function.
4. Advice on modified vegetarian diet to maintain health and minimize weight loss from cancer effects.
5. Hyperthermic heat treatments if applicable.
6. Pain management to reduce pain and improve function.
7. Intense counseling for patient and family members to combat fear, anxiety, feelings of hopelessness, and depression.
8. Most of all: We offer prayer and increased spiritual awareness of the power of prayer, and we help our patients to exercise faith in a living God, asking for His guidance and intervention in the patient's cancer care.

Home Program

Home maintenance programs are offered at a nominal fee when the patient returns home, based on need.

Treatment Levels and Cost

Services covered by some health insurance companies

1. The doctor's initial and weekly evaluations
2. Physical therapy modalities
3. Pain management Treatments

You are responsible for your treatment cost before services are rendered, so check with your health insurance company to determine what is covered, we can bill your health insurance company for you for a nominal fee.

Services not covered by health insurances

The complex herbal nutritional supplementations are not covered by health insurance companies and must be paid at least one week in advance.

All treatments are paid in advance.

There are five levels of treatments available.

Your cost depends on the level and intensity of care determined by the doctor.
